MSA-15 Meter

Liquid Controls Europe MS Series rotary motion positive displacement (PD) meters offer the ultimate in measurement accuracy for custody transfer of petroleum products, aviation fuels, LPG and a broad of industrial liquids.

Superior performance features

Low pressure drop – will operate on gravity flow or pump pressure.

Sustained accuracy – no metal-to-metal contact inside the measuring chamber means minimal wear and deterioration in accuracy over time, fewer recalibrations and a longer service life. Meters conform to NIST and International Weight and Measures accuracy requirements.

Wide viscosity range – LCE meters can accurately meter products from less than 30 SSU (1 cP) to 1500000 SSU (325000 cP).

Maximum adaptability - choice of stock or custom elbows/fittings provides unequalled mounting flexibility to meet widely varying installation requirements.

Industries served

LCE series SM meters are well-suited for use in industries requiring precise flow measurement and reliable, extended service life:

- Refined petroleum products
- Aviation fuels
- LPG
- Agricultural chemicals
- Paints and coatings
- Foods and beverages
- Petrochemicals
- Pharmaceuticals
- Cosmetics
- Printing inks
- Textiles
